Construction notice

Gateway to Bruce Upgrade (G2BU) project: Early works – November 2026

From November 2026, early works will progress on the Gateway to Bruce Upgrade (G2BU) project along the Gateway Motorway, between Bracken Ridge Road and Wyampa Road.

This project will address long standing congestion and safety issues on north Brisbane's busiest transport corridor.

Early work activities

Early works activities involve:

- Establishing work zones adjacent to the Gateway Motorway, between Bracken Ridge Road and Wyampa Road and undertaking initial earthworks.
- Implementing traffic management on the Gateway Motorway between Bracken Ridge Road and Wyampa Road including:
  - Installing temporary signage, barriers, fencing and lighting.
  - Line marking and speed reductions.
- Utility identification and locating works including vacuum excavation, as required.
- Geotechnical and contamination investigation including boreholes and digging test pits for samples in several locations
- Vegetation surveying and clearing.

What this means for you

- Some traffic changes on the Gateway Motorway, Deagon Deviation and Bracken Ridge Road including shoulder closures as well as off-peak lane closures.
- Please allow extra time when planning your travel and follow the directions of roadside signage, traffic controllers and wayfinding signage.
- Nearby residents and businesses can expect to experience short-term impacts including increased noise and dust during the works.
- Reversing beepers and flashing lights are a safety requirement and will be used during working hours.
- Access to private properties will be maintained during the works.

Work hours

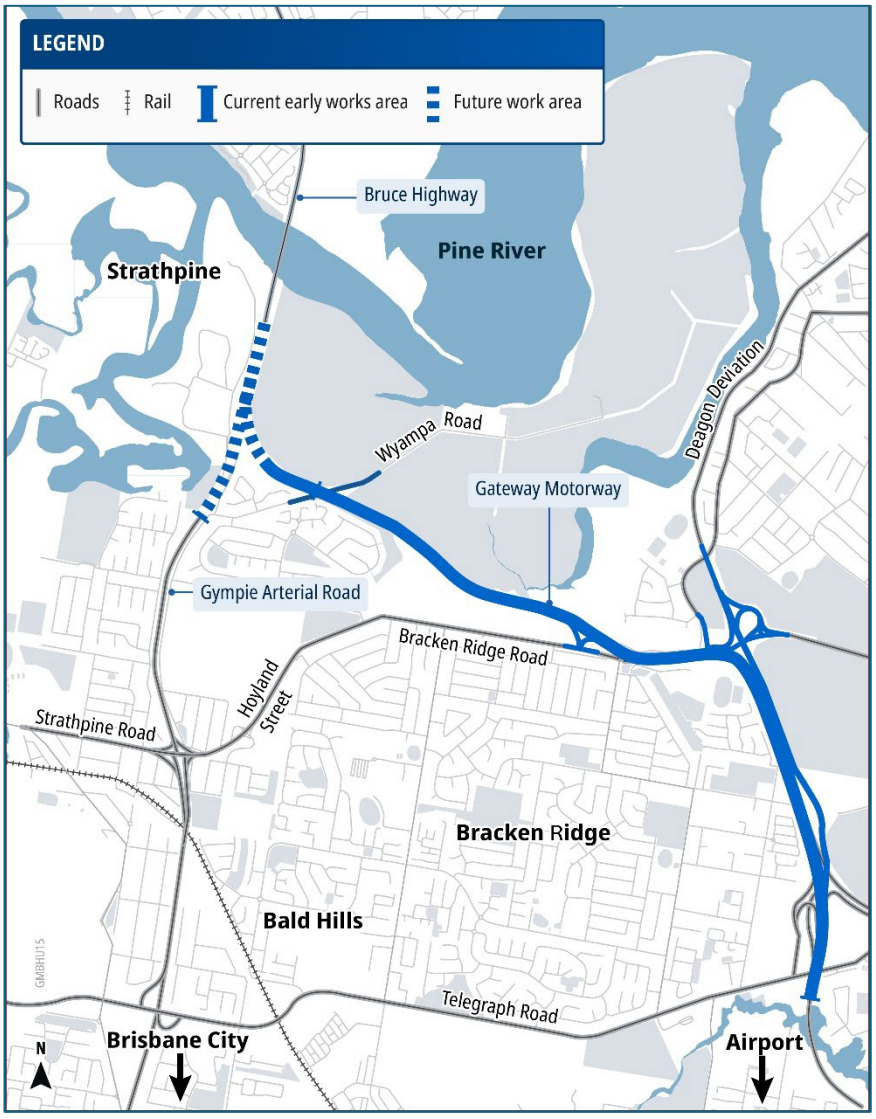

- Day time activities will occur from 6am to 6pm, Monday to Saturday.
- Night works will be required to minimise traffic impacts and will occur from Sunday to Thursday between the hours of 6pm to 6am.

Every effort will be made to minimise impacts on the local community and surrounds. The Department of Transport and Main Roads (TMR) appreciates your patience and cooperation while these important works are carried out.
