The Wave

Mooloolah River Interchange Upgrade (Stage 1)

Early works have commenced in your local community

REF: PC37517 | October 2025

Environmental approvals have now been finalised, allowing early works to get underway, marking a significant first step towards delivering this legacy project for the Sunshine Coast.

The Mooloolah River Interchange (MRI) Upgrade will address long-standing congestion and safety issues on the Sunshine Motorway and improve north-south road connectivity.

This project is critical to the delivery of The Wave - a transformational public transport initiative for the Sunshine Coast.

What we're doing

- Site preparation works including clearing.
- Service relocations for electricity, water and telecommunications.
- Geotechnical investigations to prepare for major earthworks construction.

Following early works, major earthworks and main construction will follow in 2026, weather and construction scheduling permitting.

This marks the beginning of a significant construction program that will continue for many years.

We understand that construction can bring temporary disruptions and appreciate your patience as we work to deliver this transformative project.

What this means for you

Daytime works between 7am and 6pm (Monday to Friday), including occasional weekends.

Some nightworks between 6pm and 6am, including occasional weekends.

Active transport pathways will have temporary redirections in place in 2026. Further information to follow.

The temporary public car park on Brisbane Road (via Incana Court) will be impacted and permanently closed in early 2026. Further information to follow.

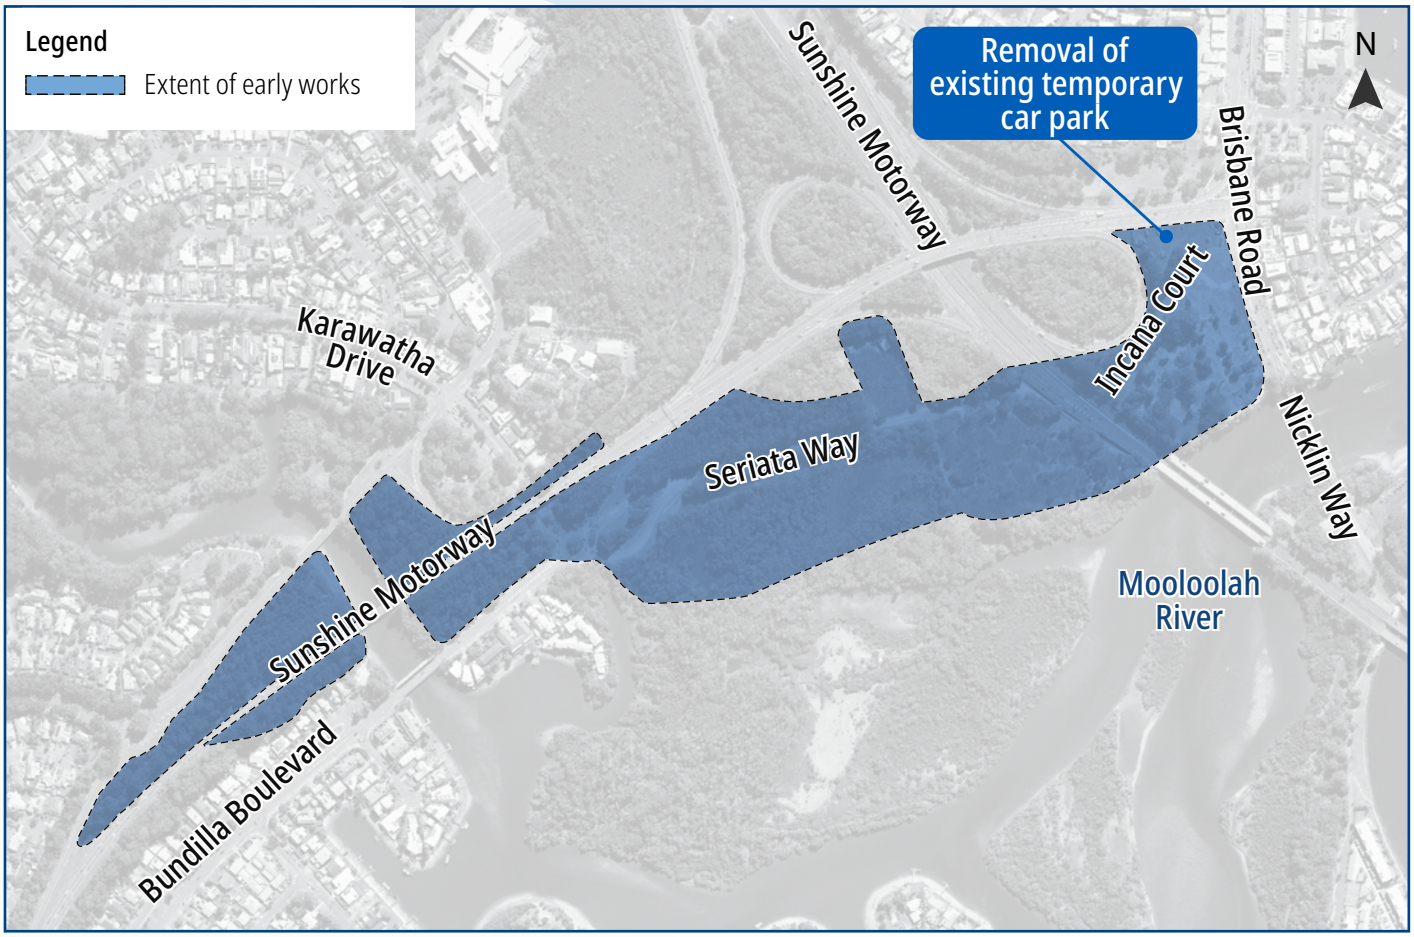

Reduced speed limits, construction signage and traffic control.

Potential delays due to temporary lane closures and redirections.

Potential construction noise, light, vibration and dust.

DELIVERING FOR QUEENSLAND | Queensland Government

Mooloolah River Interchange Upgrade Stage 1 - early works

Project benefits

- Supports Regional Growth
- Eases congestion
- Enhances safety
- Better connections
- Better active transport
