Introducing CoastalTraX

The Department of Transport and Main Roads is pleased to introduce our package contractor, CoastalTraX, who will be delivering The Wave project in your area.

The consortium brings together major contractors ACCIONA and Georgiou, design partners Aurecon and Mott MacDonald, and local rail specialist DT Infrastructure.

Who is CoastalTraX?

CoastalTraX will design and deliver a substantial amount of The Wave Stage 1 works, including:

- 17km new dual-track heavy passenger rail between Beerwah and Caloundra
- new stations at Bells Creek (Aura) and Caloundra
- associated upgrades to local roads, pathways and station precinct parkland.

Detailed design update

Over the past few months, CoastalTraX has been working through design refinements across the project corridor which have considered various factors including technical and safety standards, legislation, Queensland Rail operational requirements, engineering, environmental and cultural heritage considerations.

CoastalTraX is pleased to provide the attached update to the community. Further information will be available when the detailed design is completed in 2027.
