Logan and Gold Coast Faster Rail

The Australian and Queensland governments are delivering the Logan and Gold Coast Faster Rail (LGC) project to meet the growing travel demand between Brisbane and the Gold Coast.

Key benefits for the community

- Improve accessibility at stations
- Increase the rail network capacity by doubling the tracks
- Improve safety by removing level crossings
- Make it safer and easier to walk and cycle to stations

Project overview

The LGC project will improve travel between Brisbane and the Gold Coast and help meet South East Queensland's transport needs well beyond the 2032 Olympic and Paralympic Games.

The project will allow more trains to operate, improve reliability and reduce end-to-end journey times for customers, making it easier and safer for people to travel to work and essential services.

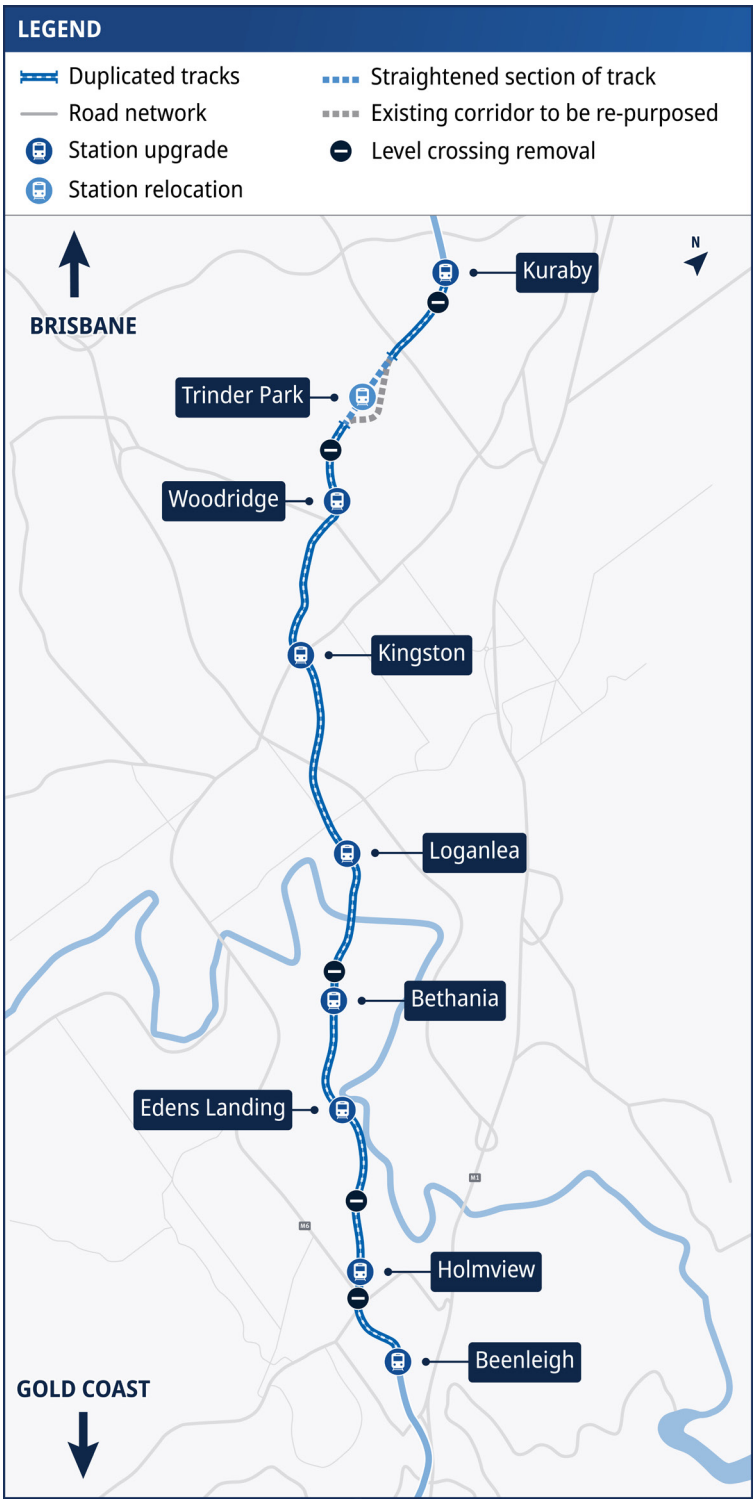

Key features

- **Doubling the tracks** between Kuraby and Beenleigh to support more frequent and reliable train services
- **Modern, safer, more accessible** stations, to make train travel easier for customers
- **Removing five level crossings** to improve safety for both rail and road users
- **Enabling works for the new European Train Control System** to make the network safer and more reliable
- **Better walking and cycling connections** to stations, making it easier to access public transport.

Working with the community

We continue to work closely with our local residents, businesses and key stakeholders to keep them informed of the project's progress and potential impacts. We also engage with accessibility, environmental, active transport and First Nations groups to recognise their vital role in shaping a project that reflects community needs, protects the environment, and delivers inclusive, culturally informed outcomes.
