Construction notice

Gateway to Bruce Upgrade (G2BU) project: Gateway North Bikeway detour – late November 2026

From **late November 2026**, the Gateway North Bikeway will be temporarily closed between Barrett Street and the Barfoot Street underpass, Bracken Ridge. The closure will be in place for approximately 12 to 18 months, weather and construction conditions permitting. Path users will be detoured via Barrett Street, Denham Street and the Playford Lagoon pathway

The temporary closure is required to safely facilitate works alongside the motorway for the Gateway to Bruce Upgrade (G2BU) project.

This project will address long standing congestion and safety issues on north Brisbane's busiest transport corridors.

Why is there a temporary bikeway detour?

This section of the bikeway runs directly alongside the Gateway Motorway work zone. The temporary detour will ensure path users are separated from construction activities including:

- establishing work zones, temporary fencing and barriers
- service investigation and installation works
- noise barrier removal and replacement
- construction vehicle and machinery movements.

What this means for you

- Path users will be detoured via Barrett Street, Denham Street and the Playford Lagoon pathway (see map overleaf). The detour adds approximately 550m to your journey.
- The detour uses existing paths, road crossings and lighting. Additional lighting is being installed along the Playford Lagoon pathway.
- Detour signage will be installed before the closure and will remain in place for its duration.
- Pedestrian access to the Barfoot Street underpass maintained during the works.
- Please allow extra time for your journey and follow the directions of detour signage.
- Access to private properties will be maintained.

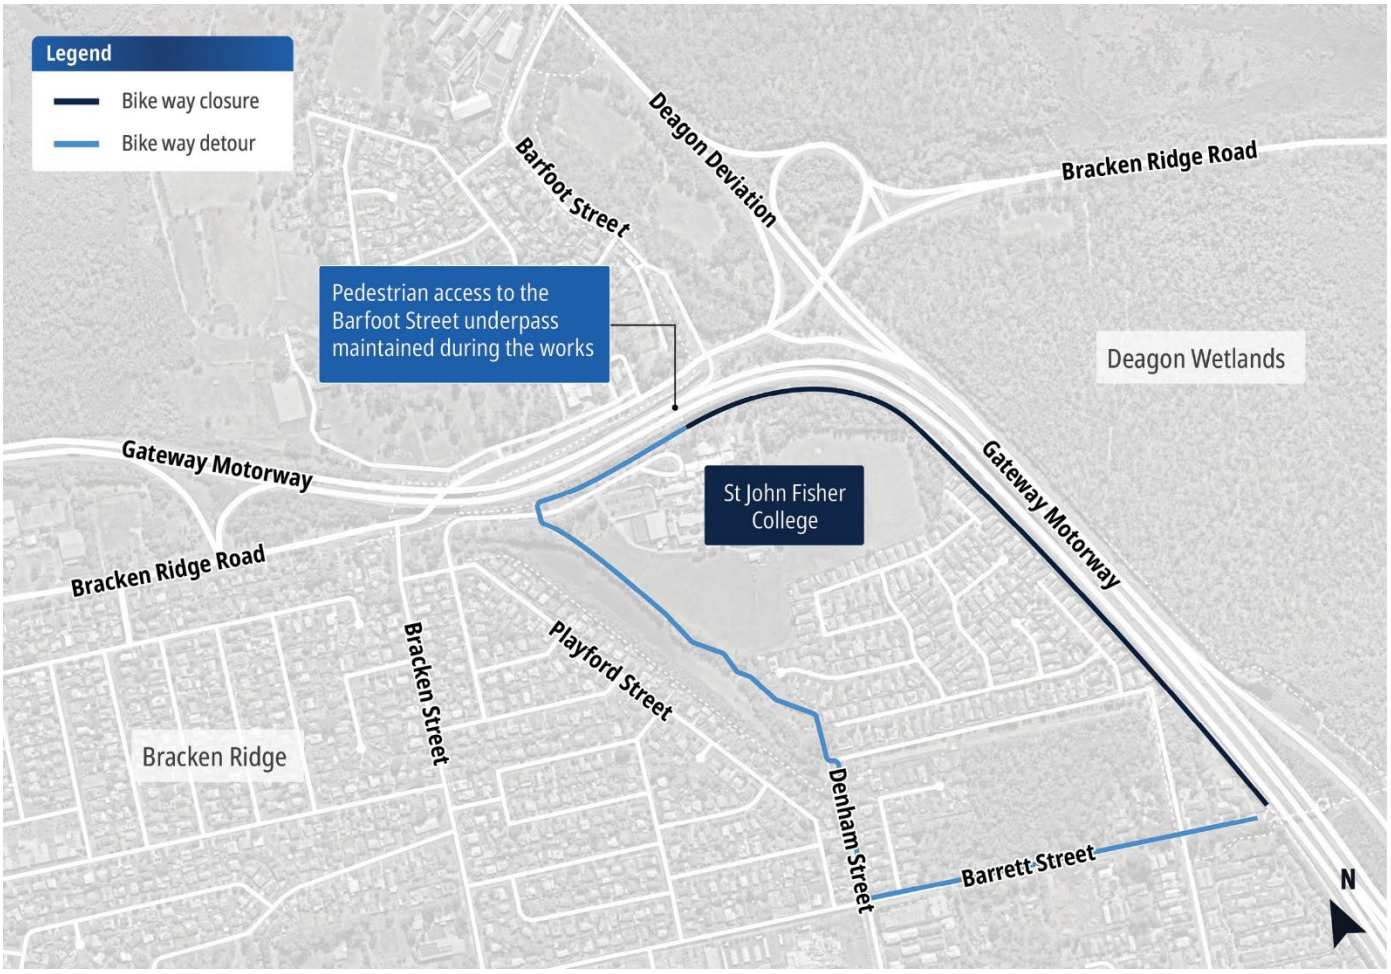

Every effort will be made to minimise impacts on the local community and surrounds. The Department of Transport and Main Roads (TMR) appreciates your patience and cooperation while these important works are carried out.

Once complete, the project will deliver improved active transport facilities and connectivity, including a new shared path adjacent to the Gateway Motorway from Bracken Ridge to Bald Hills.

Keeping the community updated

We are committed to keeping the community informed as the project progresses. Regular email updates will be provided to residents and businesses about upcoming works.

Please scan the QR code to sign-up to receive regular email updates and stay informed about the latest project news.

Key benefits for the community

- Safer, more reliable journey
- Shorter travel times
- Increases capacity
- Improves network efficiency
